

Oil & Gas

High Performance Heat Tracing For Harsh Environments

QMax Industries, Inc. designs and manufactures specialized process heating systems for industrial piping, vessels and equipment.

Partnering with clients to develop innovative solutions for demanding applications is our passion.

O&G companies rely on **QMax** every day to minimize downtime and maximize profitability.

Removable Insulation Blankets

QMax offers Custom-Made, Removable Insulation Blankets for a variety of process equipment including valves, pumps, meters, strainers and vents. These insulation blankets are specifically designed and constructed in a shop environment with the finest parts to ensure long-lasting quality.

QMax makes each blanket from silicon-impregnated, fiberglass insulation with a Teflon™ coating with a choice of attachment mechanisms. We also offer glycol and electric tracing options depending on the application.

QMax Oil & Gas Products:

- Maximize Heat Transfer
- Maximize Efficiency
- Premium Installation
- Minimize Downtime
